Summary Statement

This grant will fund the purchase and installation of a furling jib to improve the safety of sailing operations and allow better one-person handling of the boat.

II. Funding Request Information

1. Proposal / Purpose

The current standard jib sail requires me to go on the bow to setup and configure the jib sail while underway. This requires leaving the helm/steering area and leaving passengers unmonitored while underway. This is especially difficult when wind creates rough seas. It also makes passengers uncomfortable that I am leaving the helm. The goal is to install a self-furling jib that can be controlled with lines from the helm, significantly increasing safety.

2. Sustainability and Assessing Impact

This self-furling jib creates a safer environment for me as the crew and for my passengers. I always want to ensure every veteran is comfortable and relaxed.

For programs or projects which are collaborations among two or more organizations or where an organization provides in-school or after-school programming for schools, the Community Foundation requires a list of organizations or schools partnering with your organization as well as Letters of Support.

For the purposes of this application, collaborations are defined as partnerships where two or more agencies are committed through staffing, funding, and resource allocation to the goals and objectives of the program described. Because the nature of the collaboration requires two or more entities to work together, for the purposes of funding, only one organization may complete the application, and in doing so, accepts responsibility for all evaluative and fiduciary reporting.

For all collaborations, the Community Foundation requires letters of support from the non-applicant organization(s) and/or from the school(s) and school district(s) at which the applicant organization is the program.
